o'clock last night.

The London Times city article, dated evening of the 29th ult. says the reduction in the rate of discount is perfectly in accordance with the indications furnished in the last gazette return; and although the heavy character of our grain importations and the prospect of some temporary onfusion in the commerce and finance in the United States from political panic preclude the possibility of an early abundance in the supply of money, there is every reason for confidence that the market will, for the next few months, be free from inconvenient pressure or violent tuations. The English funds opened that morning with a firm appearance, and manifested great steadiness throughout the day. There was a full average demand ount at the bank to-day after the alteration in the charge was made known. In the Stock Exchange the supply for loans on good securities is ample at six per cent. The discount establishments have reduced their rates from 4½ to 4 per cent for money at call, and from 5 to 4½ with seven days notice. The joint stock banks have also lowered the rate of interest from 4½ to 4 per

FINANCIAL AFFAIRS.

The Bank of England reduced its rate of discount on the 20th from six to five per cent. The movement had no effect on the funds. The demand for money on the following day was very active, both at the bank and in the open market. The rate for the best bills in the street was 4½ to 5 per cent. The American advices caused considerable anxiety. Seventy thousand sovereigns were drawn from the bank on the 30th, as well as £39,000 sterling in bar gold, for shipment per Europa. A large amount is reported withdrawn from the Liverpool branch. It was anticipated that the Atlantic, next week, would take a heavy amount. These movements affected the funds, and consols declined ½ on Friday, the 30th.

The financial writers all canvass the prospects of the American panic.

The inancial witch and the following state of the condon Times' city article of December 1 says the panic has reached a stage resembling some of the worst days of 1857; but the leading commercial people seemed to be aware of its utter groundiessness; so that the alarm was by no means equal to the agination. The London Times argues that the receipts of gold from England will immediately change the whole character of the New York morey market.

The funds have been influenced by the satisfactory character of the Bank returns. Consois advanced one-eighth per cent.

Lowron, Saturday evening, Dec 1.—Consois closed to-day at 93% a 93% for money and account.

The bank rate of interest had been reduced to five per cent, and not five and a half, as stated in Wednesday morning's New York papers.

ITALY.

The garrison of Gaeta had made a sortic in order to capture the strategical positions in the suburbs, bu were repulsed with great icas.

The following is given as the position of affairs. At Gaeta 19th, the Fiedmontese fleet had returned to Naples, the intention being to make an attack on the and side. The advanced Pissimontese-posts were 1,500 metres from the mole and forts. They were placing mortars in line to open fire, and thrpe out of the five batteries constructing were ready. The besieged kept up a fire to impede the construction of the batteries, but ineff citally Typhus fever prevailed in the garrison, which was too crowded, numbering 18,000. The Piedmontese numbered 15,000.

A state of siege was established in the Abrugzi. All persons bearing arms without permission, exciting the peasantry, or insulting the national flag, are to be shot.

Cavour's reply to the recent Prussian despatch, in which Sardinian policy was consured, is published. Cavour instead the question of the Umbrian Marches and the Two Sicilies is purely Italian, in no way affecting the rights of other Powers. He points out that Sardinia is the only conservative Power in Italy capable of overpowering the really revolutionary spirit, but warmly appeals for European sympathy instead of reboke.

A commercial convention had been ratified between Sardinia and the Hanse towns.

Arrival of the Overland Express-News from California, Oregon, British Columbia and Japan-Effect of the Southern Secession Movement, &c., &c.
FORT KRARNET, Dec. 13, 1860

The pony express from San Francisco, 1st inst., passed here at one o'clock this morning, being ahead of time on the new schedule of reduced speed. By this arrival we

have the following:-- SAN FRANCISCO, Dec. 1-3:40 P. M. San Francisco, Dec. 1—3:40 P. M.
Arrived, ship Ocean Express, New York, 30th; bark
Onward, Kanajaw; ship Osborn, Liverpool.
Sailed, 29th, ship Derby, New York, carrying over
15,000 sacks wheat, three thousand sacks barley, 850 bales
wool, 8,400 hides; steamer Cortes, with 250 passengers

and \$1,228,000 in treasure.

Our advices from New York per pony express reached to the 17th ult., and are of a character to increase both the anxiety of holders of goods to realize and the hesitation of buyers to operate. Business may be said to be at a stand, there being no immediate call for goods, and the trade are disposed to wait for further news; prices are unfavorably affected by the panic, though without transactions changes in quotations must be a matter of conjecture. If importers find it necessary to force sales a general decline will result; but in any event the late inactive condition of the market is not likely to find relief. Grain and breadstuffs are nominally unchanged. Export orders are checked, but so recently as to have yet produced no effect upon prices. The ship Eadeavor has been chartered in Coleman's line for New York. The bark Druid will load for Australia, principally with oats. The pony express, with St Louis dates to the 10th, and Fort Kearney to the 18th, arrived at San Francisco the 20th left.

From all the southern districts of the country we receive accounts of the rectai hurricane. The names done has been much more extensive than was at fire supposed. Several lives have been lost and an immeasurable destruction of property, especially in the southern district. The storm, although violent, was not so severe in the Artibonite. The rivers were swollen to an unusual extent, everflowing the banks and carrying away whole acres of arable land, and destroying a number of cattle. The storm has greatly impeded the deliveries of codies, and in consequence prices on the semboard are kept up at the high rates of \$130 to \$132 (Haytien) per bundred pounds. It is supposed that the crop has been very much injured, and in some exposed localities almost destroyed. Notwithstanding this, the crop before the storm promised to be so abundant that we still hope an average yield. If the cultivators will giean the fields carefully we will yet deliver one of the best crops recently brought to market. The decline in prices, however, in foreign countries, as we are informed by recent ary lyals, will not stimulate the laborer to such a result. The high prices paid for the last crop have put an unusually large amount of American gold in circulation throughout the country. Currency is now quoted at \$2.00, with an upward tendency.

At the mole of St. Nichelas about forty houses were destroyed by the violence of the storm.

A law has passed both houses of the tagislature ordering lighthouses to be built at Port on Prince, Cayes, Jacmel, Genaives, Cape Hayti and at Jeremie, to be built and supported by a tax of five cents per ton upon all foreign vessels entering those ports. Haytien vessels are exempt from this impost. Your New York merchants will grounded at the additional restraction, which is of no excitily use to them, while it is of great advantage to the coasting trade.

Our markets are quiet and overstocked with some de-

counting trade.

The "grand Haytien demonstrating," therefore, both place on Wednesday evening, at Zion's (colored) church, and was well attended by persons of all shades—white, black and cream color. The chair was take to by Mr. Lowe, and the Secretary being appointed, the meeting was regularly organized.

Mr. Shows Sysken (colored), recently from Hayti, and closely connected with the government of the place, entered into perticulars as to the internal resources of the country, stating that they were almost boundless both with regard to mineral wealth and fertility of soil. He recommended the free negroes of this country to emigrate there—assuring them of the protection of the Haytien republic, not only of their persond, but also of their religious liberty. He further stated that to each family of emigrants five carreaux cach carreau being over three acres) of fresh and fertile land, capatie of grawing all the fruits and staples of the tropics, will be graduationally given, on the side condition that the emigrants should settle on it and collivate it, and declare their intention of becoming citizens of Hayti. To unmarried men or similar conditions, two carreaux would be granted.

No military service would be required, excepting voiunteer service, drilling once a month. After making some further remarks he stated that laws had been omacted by the President, Council and Legislature of Hayti for the pretection and naturalization of emigrants of the African and Indian races, offering them great advantages, nearly equal with these enjoyed by the native Haytiens. The grants of land would be delivered without expense, and with a provisional title, to every family that shall have made, before the proper magistrate, the seciarations prescribed by law, with the view of obtaining naturalization, and they would be converted into final grants after a residence of a year and a day in the country.

Nothing has occurred lately to astonish our amuse ment going people like the revival of business at the Old Bower; theatre. Mesers. Spaiding & Rogers, after lessing and fitting up the above establishment for the introduction of equestrian and dramatic enfertainments, are now in the full tide of success. There seems to be no such word as fail with Mesers. S. & R. Some years ago, in New Orleans, they took a long lease of the Peli-con theatre, which, through bad management, had become very unpopular; but these energetic and liberal managers, in improving the exterior and reconstructing the interior, expended over twenty thousand dollars, which amount was returned to them, with interest, in the profits of the establishment, at the end of the firs season, and new they are about to reap a similar benefit in re-establishing the Old Bowery. The success Mesers. Spaleting & Regers during the many years of their copartnership may be attributed to the admirable man-ner in which they conduct their business. Mr. Spale-ing manages the exterior affairs, while Mr. Regers at tends to the interior department, training the horses, teaching the children, &c., as his father did in this city at the old Broadway Circus, nearly haif a century ago. Mr. R., after a long sejourn in the South, returns to his native city, bringsejourn in the South, returns to his native city, bringing with him the New Orleans Circus, which is now
first presented to the public of this great metropolis.

The company is excellent in all its departments, presenting a greater variety of je good things" than is usually
seen at places of public amusement. No better proof of
the superiority of the company is wanting than the fact
that ever since the season commenced the Old Bowery
has been packed nightly from pit to dome, and on several
consists hundreds have been turned away, unable to
gain admittance, and notwithstanding the dense crowds
assembled the most right account has been observed.
